

# Colour Palette

The colour palette is to guide you when you are creating new components. If that's not your thing, it might still be helpful to understand how the different colours are applied. If you are creating new components, please keep in mind that we are obligated to comply with **WCAG 2.1 AA**.

**WCAG 2.1** requires a contrast ratio of **at least 3:1 for graphics** and user interface components, such as form input borders, and a contrast ratio of **4.5:1 for normal and large text**. Note that disabled states and decorative elements are both exceptions to these requirements.
